From the words or group of words lettered A to D, choose the word or group of words which best completes each of the following sentences. When the little girl hurt herself she —— her mother for sympathy. (a) looked up (b) forced (c) appealed for (d) turned to 2 The —— applianded the lecturer. (a) crowd (b) congregation (c) spectator (d) audience D The new Fiko Bridge in Lagos should help to greatly ease the terrible traffic———————————————————————————————————	S/No.	QUESTIONS	Α
when the little girl nut herself she — her mother for sympathy. (a) looked up (b) forced (c) appealed for (d) turned to 1 The ———————————————————————————————————		ENGLISH LANGUAGE SECTION English Language of grounds lettered A to D, shoose the ground or ground of grounds which heat	
when the little girl hurt herself she her mother for sympathy. (a) looked up (b) forced (c) appealed for (d) turned to The		0 1	
(a) looked up (b) forced (c) appealed for (d) turned to 2 The			-
The	1		D
The new Eko Bridge in Lagos should help to greatly ease the terrible traffic———————————————————————————————————	2		D
Able and ———————————————————————————————————	_		-
(a) awkward (b) industrial (c) officious (d) industrious D	3		
The lecture felt that it would be————————————————————————————————————	1		D
(a) inadequate (b) impolite (c) inferior (d) in appropriate From the list of words or group of words lettered A to D below each of the following sentences, choose the word or group of words which is nearest in meaning to the underlined expression as it is used in the sentences. 6 The discussion became animated. (a) robust (b) unruly (c) intellectual (d) lively 7 John did four years in the University without obtaining his degree, and his scholarship had to be withdraw (a) recovered (b) postponed (c) cancelled (d) re-allocated The driver failed to obey the speed-limit regulations in the college compound, and was summarily dismissed. (a) answer (b) understand (c) notice (d) observe 9 The rebels were forced to surrender. (a) give off (b) give out (c) give in (d) give way 10 Prospective students for admission must be eligible. (a) clever (b) fluent (c) smart (d) qualified 11 Simplify √3 + ½ A. √3 (1 + √3) B. √3 (1 + √4) C. √3 D. √2 B. 12 Evaluate Cos 45° + Sin 225° A. √2 B. 0. C. √2 D. 2√2 13 If SCR, then A. S∩R = R. B. S∩R = S C. S∪R = S D. S∩R = S' 14 Convert 35 to a number in base two. A. 1011; B. 10011; C. 100011; D. 110010; C. Then th term of a sequence is represented by 3 x 2²². Write down the first three terms of the sequence A. √3, 3, 6 B. 6, 3, √3; C. 3/2, 3, ½ D. ½, 3, ¾ 16 Simplify (1/4) A. 8 B. 4 C. ¼ D. ½ Solve the equation 5x² - 4x - 1 = 0 A1, √5 B1, √5 C. 1, √5 D. 1, √5 D. P and q are two positive numbers such that p > 2q. Which one of the following statements is not true? Ap<2 Q. Bp>-2Q. Cq<2p. D. q x½p 20 For what values of x is the expression (2x - q < 2p. D. q x½p 21 Another name for a non-realistic drawing isA. Baroque B. Impressionism C. Abstract D. Realism C The equipment used for weaving in textile is referred to as			Ъ
(a) madequate (b) impolite (c) interior (d) in appropriate From the list of words or group of words lettered A to D below each of the following sentences, choose the word or group of words which is nearest in meaning to the underlined expression as it is used in the sentences. The discussion became animated (a) robust (b) unruly (c) intellectual (d) lively D	5		D
choose the word or group of words which is nearest in meaning to the underlined expression as it is used in the sentences. 6 The discussion became animated. (a) robust (b) unruly (c) intellectual (d) lively 7 John did four years in the University without obtaining his degree, and his scholarship had to be withdraw (a) recovered (b) postponed (c) cancelled (d) re-allocated 8 The driver failed to obey the speed-limit regulations in the college compound, and was summarily dismissed. (a) answer (b) understand (c) notice (d) observe 9 The rebels were forced to surrender. (a) give off (b) give out (c) give in (d) give way 10 Prospective students for admission must be eligible. (a) clever (b) fluent (c) smart (d) qualified 11 Simplify $\sqrt{3} + \frac{1}{\sqrt{3}}$ A. $\sqrt{3}$ (1+ $\frac{\sqrt{3}}{3}$ B. $\sqrt{3}$ (1+ $\frac{1}{\sqrt{3}}$ C. $\frac{\sqrt{3}}{3}$ D. $\frac{\sqrt{3}}{3}$ 12 Evaluate Cos 45° + Sin 225° A. $\sqrt{2}$ B. 0 C. $\frac{\sqrt{2}}{2}$ D. $2\sqrt{2}$ B 13 If SCR, then A. $5 \cap R = R$ B. $5 \cap R = 5$ C. $5 \cup R = 5$ D. $5 \cap R = 5^{d}$ 14 Convert 35 to a number in base two. A. 1011 ₂ B. 10011 ₂ C. 100011 ₂ D. 110010 ₂ C. 15 The nth term of a sequence is represented by 3 x 2 ^{2-q} . Write down the first three terms of the sequence A. $\frac{\sqrt{3}}{2}$ A. $\frac{\sqrt{3}}{2}$ B. $\frac{\sqrt{3}}{2}$ C. $\frac{\sqrt{3}}{2}$ A. $\frac{\sqrt{3}}{2}$ B. $\frac{\sqrt{3}}{2}$ D. $\frac{\sqrt{3}}{2}$ A. $\frac{\sqrt{3}}{2}$ B. $\frac{\sqrt{3}}{2}$ D. \frac			
is used in the sentences. The discussion became animated (a) robust (b) unruly (c) intellectual (d) lively The discussion became animated (a) robust (b) unruly (c) intellectual (d) lively The diversity without obtaining his degree, and his scholarship had to be withdraw (a) recovered (b) postponed (c) cancelled (d) re-allocated The driver failed to obey the speed-limit regulations in the college compound, and was summarily dismissed. (a) answer (b) understand (c) notice (d) observe The rebels were forced to surrender. (a) give off (b) give out (c) give in (d) give way C Prospective students for admission must be eligible. (a) clever (b) fluent (c) smart (d) qualified D MATHEMATICS SECTION Simplify √3 + 1/√2 A. √3 (1 + √3/3 B. √3 (1 + 1/√3 C. √3/2 B. D. 5√3/3 B. D. 5√3/3 C. Featuate Cos 45° + Sin 225° A. √2 B. 0 C. √2/2 D. 2√2 B Toncert 35 to a number in base two. A. 1011₂ B. 10011₂ C. 100011₂ D. 110010₂ C. Then therm of a sequence is represented by 3 x 22°-4. Write down the first three terms of the sequence A. √3₂, 3, 6 B. 6, 3, ½ C. √3, 3, ½, D. ½, 3, ¾₁ Simplify (1/4) 1½ A. 8 B. 4 C. ¼ D. ½ Simplify (1/4) 1½ A. 8 B. 4 C. ¼ D. ½ Solve the equation 5x² - 4x - 1 = 0 A1, 1/5 B1, 1/5 C. 1, 1/5 D. 1, 1/5 D. P. A. Ps - 2Q B. ¬p > -2Q C. ¬q < 2Q D. Q < 4×p To what values of x is the expression (x) 2 D. 2√2 D. Q < 4×p The odd promotive numbers such that p ≥ 2Q. Which one of the following statements is not true? A. ¬p < -2Q B. ¬p < -2Q C. ¬q < 2Q C. ¬q < 2Q D. D. Q < 4×p The odd promotive numbers such that p ≥ 2Q. D. Q < 4×p The odd promotive numbers such that p ≥ 2Q. D. Q < 4×p The modelling of the upper part of the human figure is referred to as a —————————————————————————————————			
The discussion became <u>animated.</u> (a) robust (b) unruly (c) intellectual (d) lively John did four years in the University without obtaining his degree, and his scholarship had to be withdraw (a) recovered (b) postponed (c) cancelled (d) re-allocated B The driver failed to obey the speed-limit regulations in the college compound, and was summarily dismissed. (a) answer (b) understand (c) notice (d) observe The rebels were forced to <u>surrender.</u> (a) give off (b) give out (c) give in (d) give way C Prospective students for admission must be eligible. (a) clever (b) fluent (c) smart (d) qualified D MATHEMATICS SECTION 11 Simplify √3 + √3 A. √3 (1 + √3) B. √3 (1 + √4) C. √2 D. 2√2 B Evaluate Cos 45° + Sin 225° A. √2 B. 0 C. √2 D. 2√2 B Evaluate Cos 45° + Sin 225° A. √2 B. 0 C. √2 D. 2√2 B 12 Evaluate Cos 45° + Sin 225° A. √2 B. 0 C. √2 D. 2√2 B 13 If SCR, then A. S/No.	QUESTIONS	Α
	ENGLISH LANGUAGE SECTION	
	Instructions: In each of the following sentences there is one word underlined and one gap from the list of	
	words A to D choose the word that is most nearly opposite in meaning to the underlined word and which will	
	correctly fill the gap in the sentences.	
1	Adebayo had felt <u>sure</u> of winning the election but as the officials countered the voters, he felt really (a) ambiguous (b) uncertain (c) disturbed (d) insecure	В
2	People who are normally often turn out to be <u>dauntless</u> heroes in the face of real danger. (a) unsteady (b) cowardly (c) colourless (d) bashful	В
3	After an exciting life aboard in the army he found farming at home extremely (a) difficult (b) repulsive (c) unprofitable (d) boring	D
4	His <u>conceited</u> altitude after the victory contrasted sharply with his friends (a) humiliation (b) disgrace (c) shame (d) modest	D
	From the words or group of words lettered A to D, choose the word or group of words which best completes each of the following sentences.	
5	Please could youthe radio so that it's not quite so loud. (a) turn out (b) turn down (c) turn in (d) turn off	В
6	Kola wore his national which was made up of flowing garment with beautifully embroidered trousers. (a) outfit (b) suit (c) costume (d) uniform	С
7	Tom and Mabelthe wedding as guests of the bridegroom. (a) Called on (b) attended (c) avoided (d) witnessed	В
8	This is a venture in which everyone shares in the work, and in the profit. (a) limited (b) corporal (c) friendly (d) cooperative	D
9	The train speed after rounding the corner. (a) picked over (b) picked on (c) picked off (d) picked up	D
10	The two countries refused to compromise on their border dispute and all efforts at a settlement ended in a(a) cessation (b) suspension (c) recess (d) stalemate	D
	MATHEMATICS SECTION	
11	An arc of a circle of radius 7cm is 14cm long. What angle does the arc subtend at the centre of the circle (Take $\Lambda = \frac{22}{7}$). A. 9.1cm B. 7.8cm C. 8.7cm D. 9.9cm	D
12	A chord subtends an angle of 34° at the centre of a circle of radius 4cm find the length of the chord (Take $\sqrt{1} = \frac{22}{7}$). A. 3.75cm B. 4.76cm C. 5.85cm D. 6.12cm	С
13	Calculate, to three significant figures, the length of an arc which subtends an angle of 70° at the centre of the circle of radius 4cm (Take $\Lambda = \frac{22}{7}$). A. 4.56cm B. 3.85cm C. 4.89cm D. 3.56cm	С
14	What is the length of the arc of a circle radius 1.4cm which subtends an angle of 110° at the centre of the circle (Take $\sqrt{1} = \frac{22}{7}$). A. 2.69cm B. 3.56cm C. 4.51cm D. 2.84cm	A
15	Find the perimeter of a circle of radius 7.5cm (Take $\sqrt{1} = \frac{22}{7}$). A. 12.35cm B. 47.14cm C. 38.53cm D. 34.34cm	В
16	XY is a chord of a circle of radius 6cm, subtending an angle of 60° at the centre, find the length of the arc XY, correct to 3 significant figures. A. 6.29cm B. 5.28cm C. 7.25cm D. 5.96cm	A

17	Find the 8 th term of the A.P, -3, -1, 1,	В
18	Express the product of 0.06 and 0.09 in standard form A. 5.4 x 10 ⁻³ B. 5.4 x 10 ⁻¹ C. 5.4 x 10 ⁻⁴ D. 5.4 x 10 ⁻⁴	Α
	A group of students took a test and the following frequency table shows the scores	С
19	Scores 012345	
19	Frequency 234272	
	The median score is A. 0, B. 2.5 C. 3 D. 5	
20	If Cos $60^{\circ} = \frac{1}{2}$ which of the following angles has a cosine of $\frac{1}{2}$? 30° B. 120° C. 150° D. 300°	D

21	A man standing 300m away from a wall sounds a whistle. The echo from the wall reaches him 1.8s later. Calculate the velocity of sound in air (a) 540.0ms-1 (b) 83.3ms-1 (c) 333.3ms-1 (d) 270.0 ms-1	С
22	Two objects of masses 80kg and 50kg are separated by a distance of 0.2m. If the gravitational consist is 6.6 x10-11 Nm2kg-2, Calculate the gravitional attraction between them. (a) 1.3 x 10-8N (b) 6.6. x 10-8N (c) 6.6 x 10 -6N (d) 2.6 x 10-5N	С
23	Which of the following is stored by a dry lechanche cell? (a) Solar energy (b) Heat energy (c) Chemical energy (d) Electrical energy	С
24	A 90W immersion heater is used to supply energy for 5 minutes. The energy supplied is used to completely melt 100g of a solid at its melting point. Calculate the specific latent heat of fusion of the solid. (a) 2.81jg-1 (b) 6.25jg-1 (c) 168.751sg-1 (d) 8.89jg-1	С
25	An induction coil is generally used to (a) Rectify an alternating current (b) Smoothen a pushing direct (c) Modulate oil incoming radio signal (d) Produce a large output voltage	D
26	The unit of stress is (a) Nm (b) N (c)Nm-2 (d) Nm2	С
27	Which of the following statements is not correct. Isotopes of an element have (a) The same number of electric charges on the nucleus (b) The same chemical properties (c) Different proton numbers (d) Different nucleon	С
28	Which of the following representation is correct for an atom x with 28 electrons and 30 neutrons? $ \frac{30x}{28} \qquad \qquad \frac{28x}{(b)} \qquad \frac{58x}{30} \qquad \qquad \frac{58x}{(c)} \qquad \frac{58x}{28} $	D
29	When a metal surface is irradiated, photoelectrons may be effected from the metal. The kinetic energy of the ejected electrons depends on the (a) Amplitude of the radiation (b) Detection device for the electrons (c) Frequency of the radiation (d) Source of the radiation	С
30	The half-life of a radioactive substance is 2 seconds. Calculate the decay constants. (a) 0.347s-1 (b) 0.576s-1 (c) 0.151s-1 (d) 0.035s-1	Α
	CHEMISTRY SECTION	
31	Which one of these compounds will NOT give oxygen on heating? A. Manganese dioxide B. Hydrogen peroxide C. Zinc nitrate D. Ammonium nitrate	Α
32	Which of the following statements applies during the electrolysis of sodium hydroxide solution using platinum electrodes? A. Na+ ions are discharged at the cathode B. Hydrogen ions are discharged at the anode C. The concentration of sodium hydroxide increases at the cathode only	С
33	Which of the following raw materials would be required for the smelting of iron ore in a blast furnace? A. CaCO3 B. Zn(NO3)2 C. CuSO4 D. AlCl3	Α
34	Phosphorus burns in oxygen according to the equation P4 + 5O2→P4O10 . How many litres of oxygen will be required at S.T.P for complete oxidation of 12.4g of phosphorus? A. 5.20 B. 11.20 C. 44.8 D. 24.8	С
35	The reaction $3C(s) + 2Fe2O3(s) = 4f$ Fe + $3CO2(g) \Delta H = -46K$ JImole is: A. Adiabatic B. Isobaric C. Exothermic D. Endothermic	С
36	The equation that best represents the decomposition of lead II trioxonitrate V is: A. $2Pb(NO3)2(s) \rightarrow 2PbO(s) + 4NO2(g) + O2(g)$ B. $Pb(NO3)2(s) \rightarrow PbO(s) + NO2(g) + O2(g)$ C. $Pb(NO3)2(s) \rightarrow PbO(s) + NO2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g) + O2(g)$ D. $PbO(s) + O2(g) + O2(g) + O2(g) + O2(g) + O2(g) + O2(g)$	Α
37	The dissolution of potassium iodide in water is an endothermic process but occurs spontaneously because theA. Entropy change is negative B. Free energy change is zero C. Free energy change is positive D. Entropy change is positive	D
38	Mixable fluids X and Y of boiling points 78oC and 100oC can be separated by A. distillation and collection of Y as distillate B. distillation and collection of X as distillate C. Fractional distillation and collection of X as distillate D. Fractional distillation and collection of Y as distillate	С
39	In electrolysis, the passage of the current is always solely responsible forA. The migration f ions towards the electrodes B. The original ionization of the solution C. The original dissolution of the electrolyte D. The liberation of two gases	Α
40	When any metallic ion is discharged at an electrode A. It loses more electrons B. It receives one electron from the electrode C. It receives electrons from the electrode until it is electrically neutral D. It donates its electrons to the electrode	С

11	A solid is made up of a cylinder with a hemisphere on top. Calculate its surface area. A. 40.85cm2 B. 41.35cm2 C. 43.75cm2 D. 43.25cm2	С
12	Find the volume of a sphere with 30cm as diameter A. 15000cm2 B. 14235cm2 C. 15250cm2 D 14139cm2	D
13	Calculate the surface area of a sphere of radius 7cm (Take = 22/7). A. 600cm2 B. 625cm2 C. 528cm2 D. 616m2	D
14	Find the surface area of a sphere whose volume is 48.72cm2.A. 64.5cm2 B. 58.7cm2 C. 53.5cm2 D. 61.25cm2	Α
15	Find the total area of the surface of a solid hemisphere of diameter 6.6cm. A. 99.56cm2 B. 100.3cm2 C. 102.68cm2 D. 89.36cm2	С
16	Find the volume of a given triangular prism with a right-angled triangle 9cm by 12cm by 16cm and the length 18cm. A. 902cm2 B. 876cm2 C. 890cm2 D. 972cm2	D
17	The difference between the length and width of a rectangle is 6cm and the area is 135cm2. What is the length. A. 12cm B. 14cm C. 15cm D. 9cm	С
18	How many square tiles each of side 8cm are needed to tile a floor 22m 40cm long by 12m 80 cm wide A. 40,150tiles B. 44,800tiles C. 41,000tiles D. 45,150tiles	В
19	A rectangular pool 10m by 5m is surrounded by a path 1m wide. What is the area of the path A. 41cm2 B. 37cm2 C. 34cm2 D. 28cm2	С
20	The 6th term of a GP is -2 and its first term is 18. What is the common ratio? A1/2 B1/3 C. ½ D. 2	В

	PHYSICS SECTION	
21	Given that the gravitational constant is 7x10-11 Nm2kg2, What is the force of attraction between 106kg mass of iron? (a) 7 x 10-20N (b) 7 x 10-8N (c) 7x 10 -2N (d) 7 x 103N	С
22	A rectangular coil of wire can rotate in a magnetic field. The ends of the coil are soldered to the two halves of a split ring. Two carbon brushes are made to press lightly against the split ring and when these are connected in circuit with a battery and rheostat, the coil rotates. This is a description of (a) An Induction coil (b) A d.c generator (c) An electric Motor (d) A moving – cell ammeter	С
23	How long will it take to heat 3kg of water from 28oC to 88oC in an electric taking a current of 6A from e.m.f source of 220V? (Take the specific heat capacity of water = 4180J-1 K-1) (a) 96s (b) 1.20s (c) 570s (d) 600s	С
24	Which of the following particles conduct electricity through salty water? (a) Ions (b) Electrons (c) Molecules (d) Neutrons	Α
25	Which of the following statements about the atom is/are correct (I) Energy is needed to remove electrons from an atom (II) Particles in the nucleus of an atom are bound together by strong forces (III) A large amount of energy us required to separate the particles in the nucleus of an atom (IV) When the nucleus of a uramum atom is split, the energy released accounts for the difference in the masses of the products and the parent nucleus (a) I, II, III and IV (b) I and III only (c) I and II only (d) I only	А
26	Water does not drip through an open umbrella of sick material unless the inside of the umbrella is touched. Which of the following phenomenon is responsible for this? (a) Diffusion (b) Surface tension (c) Osmosis (d) Viscosity	С
27	Viscosity is a liquid does not depend on the (a) Nature of the liquid (b) Relative velocity between the liquid layers (c) Normal reaction between the liquid layers (d) Temperature of the liquid	С
28	What is the difference between a crystalline and an amorphous (a) Has cubic structure while amorphous solid has hexagonal Structure (b) Has regularly-repeating pattern while an amorphous solid has not (c) Is white amorphous solid is yellow (d) Melts on heating while an among hens solid sublimates on heating	В
29	Which of the following is not an evidence of the particle nature of matter? (a) Diffusion (b) Brownian matron (c) Crystal structure (d) Diffraction	D
30	Which of the following is a fundamental quantity? (a) Length (b) Impulse (c) Speed (d) Density	Α
	CHEMISTRY SECTION	
31	The test used to distinguish between primary, secondary and tertiary alkanols is A. Tollen's test B. Gygnand test C. Lucas test D. Sabatier's test	С
32	The product of a reaction of bromine water and ethane is	В
33	Reduction of alkanals produces A. phenols B. primary alkanols C. Secondary alkanols D. Tertiary alkanols	В
34	Which chlorine is passed into hot concentrated sodium hydroxide solution, the products formed areA. NaClO and H2O B. Naclo3, NaClO and H2 C. NaClO, Nacl and H2O D. NaClO3, NaCl, and H2O	D
35	CaCO3(s) + 2HCl(aq) → CaCl2(aq) + H2O(L), + CO2(g) In the reaction above, the rate of reaction may be increased byA. Using powdered CaCO3 B. Using lumps of CaCO3 C. Applying high pressure D. Using dilute hydrochloric acid	Α
36	The industrial gas used as a food preservative and a bleach for wool and wood pulp in industries is A. CO2 B. NO2 C. NH3 D. SO2	D
37	The colour formation of transition metal ions is associated with partially filled A. 3s orbitals B. 3p orbitals C. 3d orbitals D. 3f orbitals	С
38	An organic compound contains 0.188g carbon, 0.062g hydrogen and 0.25g oxygen. What is empirical formula of the compound? A. CH2O B. CH3O C. CH4O D. CHO	С
39	Consecutive members of an alkane homologous series differ byA. CH B. CH2 C. CH3 D. CnH2n+2	В
40	The flame used by welders in cutting metals isA. Butane gas flame B. Acetylene flame C. Kerosene flame D. Oxy-aletylene flame	D

15 If $\log_{10} a = 4$, what is a? A. 0.4 B. 1000 C. 10000 D. 400	D. 10	
		С
A student measured the length of a room and obtained the measurement of 3.99m. If the percent measurement was 5% and his own measurement was smaller than the length, what is the length of A. 3.78m B. 3.80m C. 4.18m D. 4.20m		D
When an aeroplane is 800m above the ground its angle of elevation from a point P on the ground the plane from P by line of sight? A. 1600m B. 1700m C. 400m D. 1500m	d is 30°. How far is	A
If $Q = (all perfect squares less than 30)$ and $P = (all numbers from 1 to 10)$. Find $Q \cap P = A$. $\{1, 4, 9, 16, 25\}$ B. $\{1, 9\}$ C. $\varphi = D = \{1, 1, 2, 3, 1, 4, 9, 1, 1, 2, 3, 4, 4, 9, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1,$	3 5 7 8)	В
		D
If the second and fourth terms of a GP are 8 and 32 respectively, what is the sum of the first four A. 28 B. 40 C. 48 D. 60	r terms?	D
20 If 3 loga + 5 loga - 6 loga = log 64. What is a? A. 4 B. 6 C. 8 D. 32		C
ECONOMICS SECTION		_
A major problem facing all economies is how to A. increase consumption of imported goods B. improved C. transform from a developing to a developed nation D. allocate scarce resources	rade among nations	D
22 If the arithmetic mean if 1, 2, 5, 6, X, 16 and 18 is 8 find the value of X A. 7.0 B. 6.0 C. 8.5 D. 8.0		D
The fixing of the price of an item above or below the equilibrium price is most likely to take place in a		В
A. centrally planned economy B. free market economy C. developed economy D. mixed economy	nomy	
A consumer's scale of preference is an arrangement of his A. scarce resources in order of importance E	B. needs in order of	В
importance C. sources of income and their importance D. requirement and how to satisfy them		
A firm's shut down point is reached when the average revenue fails to cover the A. average variable cost C. average total cost D. average fixed cost	t B. marginal cost	Α
Internal economies of scale are expected to bring about A an increase in short-run average cost R an i	increase in long-run	С
average cost C. a decrease in long-run average cost D. a decrease in short-run average cost	- J · -	
In the long run, a monopolist maximizes his profit when the marginal cost equals A. total revenue B. marginal revenue C. average cost D. price		В
The long run is a period during which a firm A. sells inputs to purchase fixed assets B. varies all its inputs to purchase fixed assets B. varies all its input	uts	В
C. sources all its inputs from within D. replaces all its inputs		
29 A production function relates A. cost to output B. wage to profit C. cost of input D. output to i	'	D
Which of the following is an example of a fixed costs? A. fuel cost B. electricity bill C. rent on building	D. transportation cost	С
GEOGRAPHY SECTION		
	D. Power generation	С

32	In which of the following countries is land reclaimed from the sea intensively used for cultivation?	Α
33	A. Holland B. Finland C. Belgium D. England The leading wheat producing region of the world is theA. Veldt of South African B. Downs of Australia	В
34	C. Prairie of North America D. Pampas of Argentina Transhumance is the seasonal migration of live-stockA. in search of water and pasture B. in the semi-arid steppes C. from the north to the south following the rains D. from the lowlands to the uplands	D
35	Most of the industries located in rural areas areA. transport oriented B. raw material oriented	В
36	C. high energy consumers D. market oriented In recent years, many industrial firms in the advanced countries have established branches in parts of South East Asia mainly because of theA. Warmer and more equable climate B. Cheaper and more steady supply of energy	D
30	C. Cheaper production costs D. Ready market for their products	
37	Which of the following is NOT correct in terms of the country's major product for international trade? A. Cote d'Ivoire; diamond B. Zambia; copper C. Libya; petroleum D. Mauritius; sugar	Α
38	What is the sea of Japan noted for? A. Naval training B. Recreation C. Fishing D. Mining	С
39	Which of the following countries is famous for dairy farming? A. Denmark B. Netherland C. Switzerland D. Argentina	Α
40	Which of the following is an important producer of iron ore? A. Ghana B. Burkina Faso C. The Gambia D. Liberia	D

11	What is the difference in longitude between P (Lat 50o N, Long 50o W) and Q (Lat 50o N, Long 150o W)? A300o B200o C130o D100o	D
12	The number 186047 was corrected to 186,000. Which of the following can correctly describe the degree of approximation made? I to the nearest hundred II to the nearest thousand III to 3 significant figures IV to 4 significant figures A. I and III only B. I and IV only C. II and III only D. All of them	С
13	Points P and Q are respectively 24m North and 7m East of point R. Calculate PQ in metres A. 25 B. 24 C. 20 E. 84	А
14	If Sin Θ = find tan Θ for Θ < 900 A. B. $\frac{3}{4}$ C. $\frac{1}{2}$ D. $\frac{3}{6}$	В
15	Simplify (271/3)2 A. 41/2 B. 6 C. 9 D. 18	С
16	From the data below, find the mode Scores 012345 Frequency 234272	D
17	A. 2 B. 0 C. 7 D. 4 Points P and Q are respectively 24m North and 7 East of point R. What is the bearing of Q from P to the nearest whole degree? A. 16o B. 164o C. 17o D. 108o	В
	A group of students took a test and the following frequency table shows the scores	D
	Scores 543210	
18	Frequency 27 2 4 3 2	
	Find the mean score	
	A. 1.75 B. 2 C. 2.5 D. 2.75	
19	Find the quadratic whose roots are $x = -2$ or $x = 7$	В
	A. $x^2 + 2x - 7 = 0$ B. $x^2 - 5x - 14 = 0$ C. $x^2 - 2x + 7 = 0$ D. $x^2 + 5x + 14 = 0$	
20	A sales girl gave a balance of N1.15 to a customer instead of N1.25. Calculate her percentage error.	Α

	A 0.00/ D 400/ O 0.40/ D 0.70/	
	A. 8.0% B. 10% C. 2.4% D. 8.7% ECONOMICS SECTION	
21	If goods P and Q are purchased by a consumer, a fall in the price of P while the price of Q is unchanged will cause the budget line to A. rotate outwards away from the origin B. shift parallel inwards C. rotate inwards towards the origin D. shift parallel outwards	A
22	One of the reasons for an exceptional demand curve is the A. availability of credit facilities B. availability of substitute C. change in the price of the commodity D. expectation of a future change in price	D
23	The elasticity of supply of perishable goods is A. elastic B. zero C. inelastic D. unitary	Α
24	A scientific approach in economic analysis entails A. a normative method only B. both inductive and deductives method C. a deductive method only D. both inductive and normative methods	В
25	A shift in supply curve indicates that a different quanatity will be supplied at each possible price because A. supply is facing competition B. consumers are willing to pay his/her prices C. price has changed D. other factors than price have changed	D
26	The demand for factors of production is an example of A. competitive demand B. derived demand C. composite demand D. joint demand	В
27	A student has N30.00 with which to buy a ruler costing N18.00 and an exercise book costing N25.00. If he buys the exercise book, his opportunity cost is A. the exercise book B. N25.00 C. N18.00 D. the ruler	D
28	The types, sources and used of government income are mainly concerned with A. public budget B. public finance C. public expenditure D. public revenue	В
29	The present privatization in Nigeria is aimed at A. reducing the prices of godos and services B. increasing efficiency in production C. poverty allenation D. reducing income inequality	В
30	Import substitution aims at A. substituting agricultural products with industrial ones B. substituting imports with agricultual exports C. improving the balance of payment D. the diversification of industries	С
	GEOGRAPHY SECTION	
31	The Enugu Nsukka Plateau in Nigeria is an example ofA. Tectonic plateau B. Intermountain plateau C. Disserted plateau D. Volcanic plateau	В
32	The first railways line that was built in Nigeria was fromA. Kaduna to Jos B. Zaria to Kaura Namoda C. Lagos to Maiduguri D. Lagos to Kano	D
33	The best way to promote industrialization in Nigeria is through the development of A. Cassava processing B. Textile manufacturing C. Automobile manufacturing D. Iron and steel processing	D
34	The craft industry associated with the late Ladi Kwali in Nigeria isA. Carving B. Dyeing C. Weaving D. Pottery	Α
35	An area in Shaba province in the Democratic Republic of Congo, known for the production of copper isA. Lumumbasi B. Chibuluma C. Nchanga D. Ndola	С
36	A country in Africa with little or no potential for hydro-electricity generation is A. Liberia B. Mauritania C. Sudan D. Mozambique	А
37	An example of man-made lake isA. Lake Volta B. Lake Tansanyika C. Lake Chad D. Lake Victoria	Α
38	Which of the following system provides both irrigation water and hydroelectricity? A. Shiroro B. Volta C. Aswan D. Gezira	С
39	An African city located within the Mediterranean climatic zone isA. Addis Ababa B. Cape Town C. Mombasa D. Dakar	В
40	The main factor that is responsible for the relatively cool temperature in East Africa is A. Latitude B. Altitude C. Air-mass D. Ocean current	В

	Choose the phrase or word which best completes the meaning of each sentence.	
1	One of the during the football match led to a fight between the teams.	C
	(a) incidence (b) incidences (c) incidents (d) occasions	
2	He used to play tennis, but he doesn't(a) as of now (b) any longer (c) again (d) presently	В
3	He was he had no time to eat. (a) so busy that (b) very busy (c) very busy that (d) too busy that	Α
4	It had been raining before the match started. (a) isn't it (b) hasn't (c) hadn't it (d) wasn't it	С
	The mechanic said that he mend my car before Saturday.	
5	(a) can't (b) couldn't (c) can't be able to (d) couldn't be able to	В
	In each of the questions 6-10, choose the most appropriate option nearest in meaning to the word(s) or phrase	
	underlined.	
	The young man's behavior showed that he was at the top of the tree. (a) at the highest position in his profession (b)	_
6	confused (c) at a point of preparedness to show good example (d) arrogant	A
7	The Chairman's reaction was a storm in a tea cup. (a) suitable for the occasion (b) less serious than it appeared to	<u> </u>
7	be (c) more serious than necessary (d) greatly diminished in scope	C
8	Do this job while I am away, but take your time. (a) be careful (b) be thorough (c) be fast (d) don't be in a hurry	D
	The judge took issue with the counsel who complained of double standards.	
9	(a) agreed with (b) argued with (c) criticized (d) supported	C
	It was evident to whoever listened to his speech that he also had an axe to grind. (a) an account to settle with someone	
10	(b) a tool or something to sharpen (c) a bone to pick with someone (d) a personal objective to achieve	C
	MATHEMATICS SECTION	
11	Evaluate 0.009 ★ 0.012, leaving your answer in standard form A. 7.5 x 10 ⁻¹ B. 7.5 x 10 ⁻² C. 7.5 x 10 ² D. 7.5 x 10 ¹	A
12	Factorize the following expression $2x^2 + x - 15$ $A = (2x + 5)(x + 3) \cdot P = (2x - 5)(x + 3) \cdot C = (2x + 5)(x + 3)$	В
	A. $(2x+5)(x-3)$ B. $(2x-5)(x+3)$ C. $(2x-5)(x-3)$ D. $(2x+5)(x+3)$	Α
13	An arc of a circle radius 7cm is 14cm long. What angle does the arc subtend at the centre of the circle? Take ($\Pi = \frac{1}{2}$)	Α
	²² / ₇) A. 114.55 ⁰ B. 25.7 ⁰ C. 44 ⁰ D. 98 ⁰	
14	Instead of recording the number 1.23cm of the radius of a tube, a student recorded 1.32cm. Find the percentage error	C
17	correct to one decimal place. A. 6.8% B. 14.4% C. 7.3% D. 15.4%	
15	The angle of elevation of X from Y is 30° , If XY = 40m. How high is X above the level of Y?	Α
15	A. 20m B. 10m C. $20\sqrt{3m}$ D. 50	
40	If 5 times a certain integer is subtracted from twice the squares of the integer, the result is 63. Find the integer.	С
16	A. 21 B. 3 C. 7 D. 9	
17	If $3^{y} = 243$. Find the value of y. A. 2 B2 C. 5 D. 4	D
···	The angle of a sector of a circle of diameter 8cm is 135°. Find the area of the sector	
18	($\pi = ^{22}/_{7}$) A. $9^{3}/_{7}$ cm ² B. $18^{5}/_{7}$ cm C. $25^{1}/_{7}$ D. $12^{4}/_{7}$	В
19	Find the volume of a cone of radius 3.5cm and vertical height 12cm ($\pi = \frac{22}{7}$)	В
10	A. 3.4cm ³ B. 154.0cm ³ C. 42.0cm ³ D. 21cm ³	
20	Points X and Y are respectively 20km North and 9km East of a point O. What is the bearing of Y from X correct to	D
20	the nearest degree? A. 024° B. 114° C. 204° D. 156°	
	ECONOMICS SECTION	
	Some of the key indicators of underdevelopment in a country are A. poverty, low level of literacy and low income	D
21	B. poverty, low income and low unemployment C. poverty, high level of literacy and low income	
	D. low level of illiteracy, low income and poverty	
22	One of the major factors militating against industrialization in Nigeria is the A. frequent breakdown of equipment B. failure to get	С
	foreign partners and supporters C. inadequacy of infrastructural facilities D. absence of government paricipation	
23	One way of correcting the balance of payments problem of a country is to A. devalue the currency B. introduce import-	Α
	promotion measures C. de-emphasize import-substitution industries D. buy investment abroad	
24	One of the problems arising from the localization of industries is A. high prices of output B. structural unemployment	В
	C. the exportation of output D. the scarcity of foreign exchange	
25	The major purpose of the African Development Bank is to A. educate peasant farmers in new techniques B. provide loans for	С
	development banks in distress C. provide loans for infrastructural development D. provide loans for trade development	
	As a country gets more developed, the percentage of labour engaged in agriculture tends to	D
26		
26	A. switch over to trading B. remain constrant C. increase steadily D. decrease steadily	_
	A deficit budget can be used to A. starve the economy of funds for economic development B. protect the economy from inflation	С
27	A deficit budget can be used to A. starve the economy of funds for economic development B. protect the economy from inflation C. stimulate recovery from a trade expression D. provide meausres to remedy the balance of payment	
	A deficit budget can be used to A. starve the economy of funds for economic development B. protect the economy from inflation C. stimulate recovery from a trade expression D. provide meausres to remedy the balance of payment Which of the following yields more revenue to Nigeria A. value added tax B. royalties C. direct tax D. indirect tax	C D
27 28	A deficit budget can be used to A. starve the economy of funds for economic development B. protect the economy from inflation C. stimulate recovery from a trade expression D. provide meausres to remedy the balance of payment Which of the following yields more revenue to Nigeria A. value added tax B. royalties C. direct tax D. indirect tax The benefits that accrue to a firm as a result of an improvement in the industry it belongs to are called A. internal economies of

	Which of the following is a neutral oxide?	
31	A. Sulphur IV oxide B. Carbon II oxide C. Nitrogen IV oxide D. Hydrogen surlphide	С
	Ethanoic acid is classified as a weak acid because it A. Does not react with silver, liberating hydrogen B. Reacts with zinc,	
32	displacing hydrogen C. Does not neutralize based D. Is only slightly ionized in water	D
33	Which of the following substances is an acid salt? A. NaHSO ₄ B. Na ₂ S C. H ₃ Po ₄ D. NH ₄ NO ₃	Α
	Direct combination is most useful in the preparation of	
34	A. Tertiary salts B. Anhydrous chlorides C. Insoluble metallic sulphides D. Acid salts	В
0.5	The solubility of salts often determines the method used in their preparation. Which of the following salts could not be	
35	precipitated by simple double decomposition involving metallic salts? A. AgCl B. K ₂ CO ₃ C. PbSO ₄ D. ZnCO ₃	В
36	The oxidation of propan-2-ol by acidified kmn04 yield A. Ppropanone B. Methylethanone C. Propanoic acid D.Methylpropanal	Α
	Which of the following represents ethylethanoate?	
37	A. CH ₃ CH ₂ CO ₂ CH ₂ CH ₃ B. CH ₃ CO ₂ CH ₂ CH ₃ C. CH ₃ CH ₂ COCH ₂ CH ₃ D. (CH ₃ CO) ₂ O	В
38	The gas responsible for most fatal explosions in coal mines isA. ethane B. methane C. Butane D. Propane	С
	An organic acid that can be decarboxylated to benzene when strongly heated with soda lime is A. hexanoic	
39	acid B. Salicyclic acid C. Ethandioic acid D. Benzoic acid	D
40	The melting of ice at warm temperature is Spontaneous and exothermic B. Non-spontaneous and exothermic C.	
40	Non-spontaneous and endothermic D. Spontaneous and endothermic	D

21	The first scientist to describe the cell was (a) Theodor Schwann (b) Charles Darwin (c) Mathias Schleiden (d) Robert Hooke	D
22	The organ which is sensitive to light is euglena is the (a) Gullet (b) Chlorophyll (c) Eyespot (d) Contractile vacuole	С
23	Which of the following is a similarity between a typical animal cell and a typical plant cell? Presence of (a) Cellulose cell wall (b) Chlorophyll (c) Centrally – placed nucleus (d) Cell membranes	С
24	Which of the following is the medium of transportation of nutrients within unicellular organism? (a) Blood (b) serum (c) Protoplasm (d) Plasma	С
25	The respiratory organ found in the cockroach is the (a) Air sac (b) Trachea (c) Gill (d) Lung	Α
26	Which of the following organs is associated with deamination of proteins (a) Lung (b) Stomach (c) Liver (d) kidney	С
27	The groups of sensory cells found on the upper surface of the tongue are called (a) Ampullae (b) Taste buds (c) Nerve cells (d) Tactile cells	В
28	Which of the following diseases is caused by deficiency of insulin in the body? (a) Hepatitis (b) Malaria (c) Diabetes mellitus (d) Cholera	С
29	Hypermetropia can be corrected by use of (a) Biconcave lens (b) Convex lens (c) Concave lens (d) Surgical operation	В
30	Which of the following is not a courtship behaviour exhibited by animals (a) Display (b) Territorialism (c) Hibernation (d) Pairing	С
	CHEMISTRY SECTION	
31	Which of the following processes is used in the extraction of less electropositive metal? A. Reducing their oxides B. Froth-floatation C. Electrolysis D. Passing their ores through a separator	Α
32	Which of the allotropies of tin exists at room temperature? A. Rhombic tin B. Monoclinic tin C. White tin D. Grey tin	С
33	The main difference between benzene and aliphatic hydrocarbons is that benzene A. Does not undergo elimination reaction B. Undergoes polymerization reaction C. Is insoluble in water D. Does not undergo substitution reaction	A
34	In the electrolytic extraction of aluminium, the component that is continuously replaced is theA. Electrolyte B. Salt bridge C. Anode D. Cathode	С
35	In which of the following processes is the enthalpy change negative? A. Dissociation of ammonium chloride B. Decomposition of calcium trioxocarbonate (IV) C. Decomposition of water into hydrogen and oxygen D. Reaction between acid and base	D
36	Trioxocarbonate VI ions are detected when they react with dilute acids by evolution of A. Hydrogen gas B. Oxygen gas C. Carbon II oxide D. Carbon IV	D
37	The lightest gas in the universe isA. Argon B. Helium C. Fluorine D. Hydrogen	D
38	If 2.0 x 1020 atoms of an element x have a mass of 0.03g, the atomic mass of element is A. 45gmol-1 B. 80gmol-1 C. 90gmol-1 D. 40gmol-1 [NA = 6 x 1023mol-1]	С
39	A mixture is made up of two or more pure substance inA. Variable proportions B. Reciprocal proportions C. Definite proportions D. Constant proportions	Α
40	What is the simplest formula of a compound which contains 40% sulphur and 60% oxygen? A. SO4 B. SO3 C. SO2 D. S2O3	В

	From the words or group of words lettered A to D, choose the word or group of words that best completes each of the following sentences.	
1	I think sheher mother (a) takes from (b) takes to (c) takes after (d) takes for	С
2	The next national leagues match willsometime next month. (a) come in (b) come along (c) come about (d) come off	С
3	With the recent police action we expect the high incidence of crime to (a) die down (b) die away (c) die off (d) die up No matter how much a bully tries to intimidate you just him. (a) stand up before (b) stand up against (c) stand up to (d) stand up	A C
4	to	C
5	The two men each other. (a) fell out for (b) fell out with (c) fell out from (d) fell out on	В
	In each of the following sentences, there is one word or group of words underlined and one gap. From the list of words or group of words lettered A to D, choose the one that is most nearly opposite in meaning to the underlined word or group of words and that will, at the same time, correctly fill the gap in the sentence.	
6	He was promoted for his efficiency, while his colleague was demoted for(a) ability (b) lateness (c) incompetence (d) capacity	С
7	Okon's business is flourishing while his father's is(a) withering (b) declining (c) progressing (d) vanishing	В
8	You should be so as not to be caught . (a) serious (b) sober (c) ready (d) alert	В
9	The manager who was sacked last month has been (a) retired (b) suspended (c) reinstated (d) promoted	С
10	The school authorities expected the contributions to be rather than compulsory. (a) willful (b) voluntary (c) deliberate (d) outright MATHEMATICS SECTION	В
11	A fair coin is tossed once. What is the probability of getting a head or a tail A. 0 B. ½ C. ½ D. 1	D
12	If the bearing of X from Y is 1040, What is the bearing of Y from X A. 2840 B. 0140 C. 0760 D. 1040	A
13	Simplify $\sqrt{27}$ x $\sqrt{50}$ A. $8\sqrt{6}$ B. $15\sqrt{6}$ C. $12\sqrt{6}$ D. $10\sqrt{6}$	В
14	Simplify 12 x 3 160 x 145 A. 51 B. 540 C. 380 D. 420	В

15	Simplify $(2^{\sqrt{5}})^2$ A. 7 B. $10^{\sqrt{5}}$ C. $7^{\sqrt{5}}$ D. 20	D
16	Simplify $\frac{1}{2-\sqrt{3}}$ A. 2+ $\sqrt{3}$ B. 5 C. 2- $\sqrt{3}$ D. $\frac{1}{2+\sqrt{3}}$	Α
17	$\frac{\sqrt{6} + \sqrt{2}}{\sqrt{6}}$	В
18	Simplify $\frac{\sqrt{5+3}}{4-\sqrt{10}}$ A. 8 B. $\frac{\sqrt{5+8\sqrt{10}-2+3\sqrt{2}}}{4}$ C. $3^{\sqrt{2}}$ D. $\frac{4\sqrt{5+5\cdot2+3-10+12}}{6}$	D
19	The angle of elevation of X from Y is 300. If XY = 40cm. How high is X above the level of Y? A. 40m B. 30m C. 20m D. 5m	С
20	Find the value of x for which the expression Find the value of x for which the expression is not defined A. 0, 4, -9 B. 0, -4, 9 C. 0, -2, 3 D. 1, 4, -9 ECONOMICS SECTION	В
21	The primary objective of the NDIC is to A. provide regulations guiding the finance houses B. give protection to banks against fraud C. give protection to banks depositors D. give protection to the CBN against fraud	С
22	If the country's GNP in the current year is N365 billion and the GNP in the base year is N50 billion. The GNP deflator is A. 30.0 B. 130.0 C. 15.0 D. 1.3	В
23	Insurance companies invest mainly in instruments traded on the A. commodity market B. insurance market C. capital market D. money market	С
24	The solution to the problem of double coincidence of wants requires a buyer and a seller whose demands are precisely A. complementary B. supplementary C. composite D. Competitive	Α
25	The stock exchange is a market for the buying and selling of A. existing shares B. monetary instruments C. new share D. treasury bills	Α
26	In economic analysis, a statement is said to be normative if it A. relate to value judgement B. is incorrect C. can be tested scientifically D. is contradictory	Α
27	Utility is the satisfation derived from A. demand B. production C. distribution D. consumption	D
28	The price of a good rises from N5 to N8 and the quantity demanded falls from 200 to 190 units. Over this price range, the demand curve is A. perfectly inelastic B. fairly inelastic C. perfectly elastic D. fairly elastic	В
29	In a planned economy, the emphasis is on A. public ownership and control B. prices and competition C. individual choices and decisions D. private ownership and control	Α
30	If there is an increase in demand without a corresponding increase in supply, there will be a A. rise in price B. shift in demand curve to the left C. fall in price D. shift in supply curve to the right GOVERNMENT SECTION	Α
0.4		
31	A constitutional amendment that is cumbersome is usually described as A. Subtle B. Unitary C. Rigid D. Flexible	С
32	The head of government in a parliamentary system is theA. Chancellor B. Prime Minister C. Governor D. President An advantage of a federal system of government is that itA. Encourages unity in diversity B. Is less expensive to operate	B A
34	C. Facilitates quick secession D. Promotes even economic development The executive and ceremonial powers are exercised by the head of the state in a A. Confederal quetom, P. Providential quetom, C. Federal quetom, D. Haiton, quetom	В
35	A. Confederal system B. Presidential system C. Federal system D. Unitary system Residual powers in a federation are exercised by theA. Federal and local governments B. Federal and state governments C. State governments D. Federal government	С
36	When two or more parties join to form a government, we have aA. Coalition government B. Plural government C. United government D. Mixed government	Α
37	The leader of the opposition in a parliament belongs to theA. Electorate B. Minority party in parliament C. Majority party in parliament D. Ruling party	В
38	Which of the following protects the liberties of individuals in the state? A. Cabinet B. Legislature C. Executive D. Judiciary	D
39	The main obligation of a citizen isA. The right to life B. To serve in the army C. Allegiance to the state D. To register for election	С
40	A group that presents candidates for elections is a A. Cooperative society B. Vigilante group C. Pressure group D. Political party	D

11	Convert the decimal number 89 to a binary number. A. 1011001 B. 111001 C. 1001001 D. 1001101	Α
12	Simplify $(2^{\frac{1}{2}} - 1^{\frac{1}{2}}) + 2^{\frac{1}{2}}$ A $3/\sqrt{R}$ P $7/\sqrt{R}$ C $1^{\frac{11}{2}}$ D $2^{\frac{11}{2}}$	Α
12	Simplify $(2\frac{1}{6} - 1\frac{1}{3}) + 2\frac{1}{3}$ A. $^{3}/_{16}$ B. $^{7}/_{16}$ C. $1\frac{13}{24}$ D. $2\frac{11}{24}$ Simplify $56x^{-4} + 14x^{-8}$ A. $2x^{-12}$ B. $3x^{-3}$ C. $4x^{-4}$ D. $4x^{-4}$ Simplify $\log_{10}4 + \log_{10}25$ A. 1 B. 2 C. 3 D. 4	
13	Simplify $56x^{-4} + 14x^{-8}$ A. $2x^{-12}$ B. $3x^{-3}$ C. $4x^{4}$ D. $4x^{-4}$	С
14	Simplify log 4 + log 25 A 1 B 2 C 3 D 4	В
14		
	A boy measured the length and breadth of a rectangular lawn as 59.6m and 40.3m respectively instead	D
15	of 60m and 40m. What is the percentage error in his calculation of the perimeter of the lawn? A. 10%	
	B. 1.4% C. 0.7% D. 0.1%	
16	Find the 9 th term of the Arithmetic progression, 18, 12, 6, 0, -6A 54 B 30 C. 30 D. 42	В
17	Expand $(2x-5)(x-3)$ A. x^2-x-15 B. $2x^2-11x+15$ C. $2x^2-5x-13$ D. $x^2-5x-15$	В
		A
18	Simplify — - A. — B. — C. — D. —	Λ
19	Expand $(2x-5)(x-3)$ A. x^2-x-15 B. $2x^2-11x+15$ C. $2x^2-5x-13$ D. $x^2-5x-15$ Simplify $\frac{1}{x^2}-\frac{1}{x^2}$ A. $\frac{1}{x^2}$ B. $\frac{1}{x^2}$ C. $\frac{1}{x^2}$ D. $\frac{1}{x^2}$ If $3p-q=6$ and $2p+3q=4$, find q. A. 0 B. $\frac{1}{2}$ C. $\frac{2}{3}$ D. 1	A
	11 5 p q 0 and 2p 5 q 1, ma q. 11. 0 B. 72 C. 73 B. 1	В
20	Solve the equation $\frac{1}{5} + \frac{1}{50} = 3$ A. $2^{1}/_{5}$ B. $1^{2}/_{5}$ C. $1^{1}/_{3}$ D. $1^{4}/_{15}$	В
	BIOLOGY SECTION	
	Which of the following pairs of tissues is responsible for strengthening the plant? (a) Xylem and cambium (b)	~
21	Collenchyma and Cambium (c) Collenchyma and Sclerenchyma (d) Phloem and Epidermis	C
	The cell membrane of a cell is said to be semi-permeable because (a) It is actively selective in allowing substances	
22	pass through it. (b) Fatty acids are only the building blocks of the membrane (c) It actively allows all substances	Α
	to pass through it by diffusion (d) It allows only large molecular substances to pass through it into the cell	
	The term "syncarpous" is used to describe a flower when the carpals are (a) Two only (b) Two and separate (c)	G
23	Many and fused (d) Lying at different parts of a flower	С
	Which of the following structures are characteristics of insect pollinated flowers? (a) Dull coloured flowers with	
24	no nectar (b) Stigma are large, feathery and having outside the flower (c) Brightly coloured petals, scent and	С
	nectar (d) Very light, numerous and pendulous stamen	
	The series of changes that occur in a seed by which the embryo develops into a seedling is known as (a)	ъ
25	Fertilization (b) Germination (c) Pollination (d) Regeneration	В
	At the end of photosynthesis the green leaf is tested for starch and not glucose, because	
26	(a) The glucose formed is immediately converted to starch (b) Starch is stored only in leaves	Α
-	(c) There are no chemicals for glucose test in leaves (d) It is easy to test for starch	1.
	The distribution of organisms in a fresh- water habitat like a stream or pond is determined by the following except	-
27	(a) Rainfall (b) Temperature (c) Light penetration (d) pH of soil	D
	Which of these is not applicable to the circulation of water in nature? (a) Plants lose water by transpiration and	
28	decay (b) Water removed from oceans are permanently lost (c) Water vapour rises, cools, condenses and	В
	precipitates as rain and dew (d) Water is absorbed by plants and animals from their external environment	ש
	Prevention of erosion could best be carried out by (a) Strip cropping and poaching (b) Bush fallowing and crop	~
29	rotation (c) Contouring of sloping ground and afforestation (d) Grazing, terracing and slighting cultivation	C
	Which of the following natural resources is most readily available to all organisms?	
30	(a) Air (b) Oil (c) Food (d) Water	Α
	(") (") V. (") * VVW (") * 1 MVW.	1

F						
	CHEMISTRY SECTION If 30cm³ of oxygen diffuses through a porous pot in 7 seconds, how long will it take 60cm³ of chlorine to diffuse through the	С				
31	same pot, if the vapour densities of oxygen and chlorine are 16 and 36 respectively? A. 9.3S B. 14S C. 21S D. 28S					
32	Which of the following is not a member of the homoloyous series of the parafins (alkanes)?					
32	A. C ₃ H ₈ B. C ₅ H ₁₂ C. C ₂₄ H ₄₈ D. C ₁₅ H ₃₂	С				
33	The reaction between an organic acid and an alkanol in the presence of an acid catalyst is known as A. Saponification B. Esterification C. Hydrolysis D. Dehydration					
	Helium atoms are chemically unreactive becauseA. There are no electrons around the nucleus B. The outer					
34	electron shell is completely filled C. There are equal members of protons and neutrons in the nuclear D. The atoms contain	В				
35	only protons Starch can be converted to ethyl alcohol byA. Distillation B. Fermentation C. Cracking D. Isomerisation					
33	An alkane can be distinguished from a terminal alkyne by using an ammonia solution of copper I chloride B. a					
36	solution of bromine in tetrachloromethane C. acidified solution of potassium tetraoxxomangnate VII D. a solution of hydrogen bromide					
37	When excess ethanol is heated to 145°C in the pressure of concentrated tetraoxosulphate VII acid is A. Diethylether B. Ethyne C. Acetone D. Ethanoic acid					
38	Bronze is an alloy ofA. Copper, Zinc and Nickel B. Aluminium and Copper C. Tin and Copper D. Tin and Zinc					
39	Hydrogenation may be effected byA. The removal of hydrogen from an alkane in the pressure of a catalyst B. The addition of hydrogen to an alkane in the presence of a catalyst					
	C. The addition of hydrogen to an alkyne D. The removal of hydrogen to an alkyne					
40	Which of the following metals combines most readily with the active constituent of air to form a compound? A. Zinc B. Copper C. Aluminium D. Potassium

			(a) 2:1:1 (b) 1:3:1 (c)				
26	Which of the following diseases or disorders can be prevented by the application knowledge of heredity through marriage counseling (a) Colour blindness (b) Haemophilia (c) Diabetes mellitus (d) Sickle cell anemia						
07	Identical twins inherit their genes from (a) Many ova and many sperms (b) The same ovum and the same sperm				В		
27	(c) The same ovum and different sperm (d) Different sperms and many ova				Ь		
28	Which of the following org				С		
29	(a) Spirogyra (b) Rhizopus (c) Chlamydomonas (d) Volrox Which of these could be regarded as an advantage of complexity in higher organisms? (a) There is no cellular differentiation						
	(b) Cellular differentiation leads to internal structural specialization (c) Cellular differentiation occurs in few cells only (d)						
	Cellular differentiation leads to loss of independence of the cells						
30	Which of the following groups carry out similar functions in living things? (a) Sclerenchyma, cartilage and chitins (b) Vertebral						
	column, chitin and guard cells (c) Tendon, Chitin and neurone (d) Blood vessels, lymph and shell						
31	CHEMISTRY SECTION The allegand obtained from the production of sean is. A Ethanol B Chrossel C Chrosl D Methanol						
32	The alkanol obtained from the production of soap isA. Ethanol B. Glycerol C. Glycol D. Methanol						
	The colour imparted to a flame by calcium ion isA. green B. Blue C. Yellow D. Brick-red						
33	If an element has the electronic configuration 1S22S22P63S23P4, it is A. a metal B. an alkaline – earth metal C. P-block element D. S-block element						
34	3.06g of a sample of potassium trioxocarbonate V was required to make a saturated solution with 10cm2 of water at 25oC.						
J+	The solubility of the salt at 25oC is [k=39, Cl=35.5, O=16] A. 5 moldm-3 B. 3moldm-3 C. 1moldm-3 D. 2.5moldm-3						
35	The cracking process is very important in the petroleum industry because itA. Gives purer products B. Yields more lubricants C. Yields more engine fuels D. Yields more asphalt				С		
	Which of these metals, Mg, Fe, Pb and Cu will dissolve in dilute HCl?				1		
36	nly	D					
37	A. All the metals B. Mg, Fe and Cu C. Mg, Fe and Pb D. Mg and Fe only Liquid x reacts with sodium trioxocarbonate IV to give a gas which turns calcium hydroxide solution milky. X isA.						
38	Na2S04 B. KI C. An Acid D. An Alkaline The oxidation state of chlorine in potassium trioxochlorate V A. +1 B. +2 C. +4 D. +5						
	Hypochlorous acid is used as a bleach becauseA. It is a storing acid B. It is an oxidizing agent C. It is a						
39	weak acid D. It is a reducing agent				С		
40	When ammonia and hydrogen ion bond together to form ammonium ion, the bond formed is calledA.				С		
	Ionic bond B. Electrovalent bond C. Co-ordinate bond D. Hydrogen bond
